

LIFEBUOY

Pool Safety Alarms

INTRODUCING BCONE THE LATEST EVOLUTION IN POOL SAFETY SYSTEMS

The BCone pool alarm integrates intelligence, versatility, and functionality into a topnotch pool safety solution. Based on advanced sensors and a complex algorithm, BCone provides maximum protection for children and pets with minimum user effort. Highly sophisticated yet simple to operate, the system can be installed and operated in a matter of minutes.

Highlights

Up to 4 pool units can be connected to one home unit.

Powerfully loud alarm on both the pool and home units.

Connects to Alexa and Google Assistant.

Smartphone connectivity to fully control the system.

Advanced algorithm prevents false alerts.

Portable so you can take it with you.

- > 5 sensitivity levels ensure that an alarm is triggered only when a large enough object enters or falls into the pool.
- > LED lights on both the pool unit and home unit provide an extra measure of visibility.
- > Swim Mode prevents the alarm from sounding when the pool is in use.
- > Made of highly durable materials for maximum reliability.
- > Alarm reactivates automatically several minutes after the pool has been vacated.
- > 3 years manufacturer's warranty.

A FAVORITE OF REVIEWERS

"Best of the best: An intelligent pool security system with many features that help make your swimming pool safer for everyone."

[Chicago Tribune Consumer Reviews](#)

"We tested six of the best pool alarms and determined that the Lifebuoy Pool Alarm System is the best pool alarm for both in-ground and above ground pools, offering a smartphone controlled alarm and wireless capability of up to 300 feet. With its batteries lasting for a full year, it offers total ease of use and convenience." [BeOnHome](#)

"The Lifebuoy Pool Alarm System is an effective, powerful sensor with a long radio range. It's great for larger pools, especially for people who move around the house a lot." [Nerd Techy](#)

DESCRIPTION

The BConc system consists of a pool unit, a home unit and smartphone connectivity. The pool unit floats on the water's surface and covers an area of 20' X 40'. Additional pool units can be purchased separately to cover larger areas.

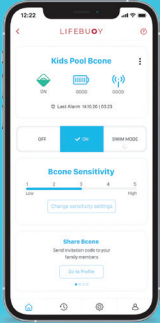

BConc works in any size, shape, or type of above or in ground swimming pool, garden pool, or hot tub. The unit detaches easily so you can take it with you. Two replaceable AA batteries come already installed. No need to turn it on. Just attach it to the pool with the included attachment kit.

The Wi-Fi enabled home unit allows full control of the pool unit, including 5 levels of programmable sensitivity. Up to 4 pool units can be connected and individually controlled from one easily operated home unit. The unit is powered by a direct connection to an electric outlet, using the included USB-C cable, with a rechargeable backup battery in case of power outage.

Download the optional BConc app to your smartphone to manage the pool unit remotely. The app's user friendly interface enables quick installation and operation. The BConc pool safety system gives you the ultimate peace of mind.
